Rex Porous Plaster

Rex Porous Plasters in Box

CHICAGO

AND

NEW YORK

## REX POROUS PLASTERS

Two dozen in box . . . . . gross 18.00

Rex is not an ordinary plaster. It is made after our special formula, perfected by years of experience, and is the best all-round plaster on the market.

It is the easiest plaster in the world to sell—its appearance is decidedly attractive, it is widely known because of constant advertising, and you can afford to stand back of the quality, since age does not decrease its full medicinal value. When you sell Rex you know beforehand that it will give entire satisfaction to every customer.

Every Rex plaster bears your name, as well as ours, on both back-cloth and wrapper, making it actually your own plaster and a good advertisement for your store.

Rex Porous Plasters were put on the market in 1898. And for years they have been, without a doubt, the best selling 25c porous plasters on the market. Other features make the Rex proposition particularly attractive. Write for details.

# BAUER & BLACK

## ADHESIVE TAPE ZINC OXIDE ADHESIVE PLASTER ON CUTTER SPOOL

**Four Yard Cutter Spool—Adhesive Tape**  
 $\frac{5}{8}$  inch wide, 1 dozen on display stand . . . dozen **3.00**

B. & B. Adhesive Tape offers a means to make twenty-five cent sales to customers who have been buying the small, one yard cylinders.

The novelty and convenience of the cutter spool appeal to everyone and the clean attractive appearance further helps the sales.

The cutter spool package for Adhesive Tape is identical with that used on five and ten yard spools of B. & B. Adhesive Plaster. It consists of an enameled tin box completely enclosing the adhesive plaster which is drawn out through a slot in the side.

The saw edge cuts the plaster as wanted.

In size, the Adhesive Tape spool is small and compact. To keep the opening constantly covered, the cutter is provided with a spring that holds it against the side.

## HEALAL LIQUID COURT PLASTER

### WATERPROOF ANTISEPTIC

Collapsible Tubes, one dozen on display stand	gross	10.00
Bottles, small size, one dozen on display stand	gross	12.00
Bottles, large size, one dozen in box . . . . .	dozen	2.00

Healal is a perfected, antiseptic, liquid court plaster. It is thoroughly waterproof, colorless and practically invisible when applied. Unusual flexibility makes it adhere firmly without loosening or peeling.

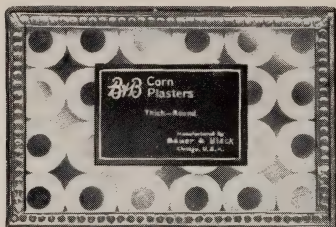

In cases of cuts, slight burns, bruises, chaps and all abrasions of the skin, Healal affords proper protection from air and germs.

Styptic strips are included with Healal bottles—both large and small sizes. One of these pressed on a cut will check the bleeding so that Healal can be applied without delay.

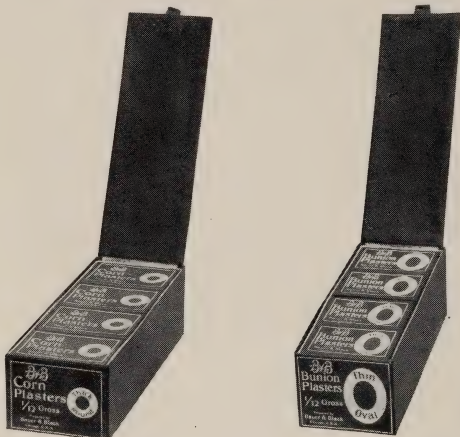

Healal is put up on attractive counter easels that help sales.

Both the tubes and bottles are thoroughly sealed and we guarantee Healal against evaporation in stock.

## BLUE-JAY CORN AND BUNION PLASTERS

### Blue-jay Corn Plasters—Medicated

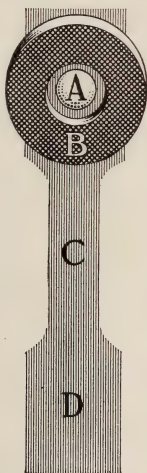

15 cent size, 4 in envelope . . . . .	gross	15.00
25 cent size, 8 in envelope . . . . .	gross	24.00

### Blue-jay Bunion Plasters—Medicated

15 cent size, 3 in envelope . . . . .	gross	15.00
25 cent size, 6 in envelope . . . . .	gross	24.00

Blue-jay Plasters are made on special machines which shape the adhesive band so that there is no binding or feeling of stiffness where it passes around the toe.

Blue-jay Corn and Bunion Plasters differ from all other remedies. They are worn night and day and so get results quickly; they always stay in place—no slipping—and they will positively remove a corn or relieve a bunion.

You can guarantee these plasters to remove a corn or relieve a bunion; if they do not, refund the money. We will stand back of you on this guarantee.

This illustration shows the Blue-jay Corn Plaster. Blue-jay Bunion Plasters are similar to the Corn Plaster, but are made Bunion size.

### Note the Picture

A is the soft B & B wax that softens the corn.

B is soft felt to protect the corn and keep the wax from spreading.

C is the toe band, narrowed to be comfortable.

D is rubber adhesive. It fastens the plaster on.

## B & B HANDY PACKAGE ABSORBENT COTTON

Here is the last word in dependable protection for aseptic cotton. The distinctive B & B Handy Package Carton, opening on the side, is retained of course, but instead of the wrapper which completely covered it there is a label that seals every crevice and fold. This label is pasted to the carton overcoming the lone objection to the wrapper—which, being loose, occasionally was torn in handling so that it no longer afforded germ-proof protection to the contents.

The pull of a string cuts the label and opens the carton. So the B & B Handy Package is far more a "Handy Package" than ever.

## HANDY-FOLD PLAIN GAUZE

6 x 36 inches—folded into squares—each in germ proof envelope

5 yards in box . . . . .	dozen	5.25
--------------------------	-------	------

B & B Handy-Fold Gauze is a dressing every doctor will appreciate. Its convenient form makes it valuable as an emergency dressing, a ready-made sponge or an absorbent pad.

Each piece consists of 216 square inches of gauze, folded to three inches square. No rough edges, no cutting, no folding. Ready for instant use.

B & B Handy-Fold Gauze is put up in boxes containing five yards of gauze—thirty folded pieces, each of which is enclosed in an individual envelope and sterilized after sealing.

Plaster Paris Bandage

Showing Improved Plaster Paris Bandage Container

## B & B PLASTER PARIS BANDAGE

B & B Plaster Paris Bandages are put up in new sealed **DOUBLE** containers which protect them thoroughly from atmospheric moisture—a most important feature.

As the above illustration shows, this double container is particularly convenient. The inner compartment holds the wrapped bandage and keeps it free from loose plaster so that it can be lifted out readily. The outer compartment, which entirely surrounds the inner, is filled with loose plaster paris for properly finishing a cast.

The B & B Formaldehyde Fumigator is the simplest practical device for evolving formaldehyde gas. Anyone can use it effectively and it is endorsed by boards of health generally.

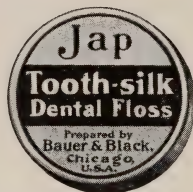

The Fumigator consists of but two parts, the perforated tube with the solidified formaldehyde, and the cover containing the wax candle or lamp for vaporizing.

- Talcum Powder
- One Piece Chamois
- Two Papers Safety Pins

## LIGATURES AND SUTURES

To meet the requirement for a Ligature which will be more slowly absorbed than regular Plain Catgut, Chromic Catgut is prepared by using chromic acid for hardening. Efforts have been made to grade the absorbability of Chromic Catgut and establish the length of time the gut will resist absorption when embedded in the thigh muscles of rabbits. Besides considering the difference between the human muscle and animal muscle, not only muscle but various tissues are repaired by Ligatures, and each muscle and tissue exercises its own peculiar action. Thus, it will be found that a piece of so-called thirty day Chromic Catgut will last the full thirty days, in accordance with the tissue in which it is embedded. In some tissue it would last from five to seven days, and perhaps twelve days when employed in the skin. For this reason, we do not deem it advisable to grade catgut as ten, twenty or thirty day, as when used in the Peritoneum, or other serous membranes, there is too great a variance in the time of absorption. Except in rare cases, medium hard Chromic Catgut will be found sufficiently resistant to absorption.

### The durability of Catgut varies as to:

**FIRST:** Its preparation with hardening agents. Medium hard Chromic Catgut is twice as lasting as Plain Unchromicized Gut. Extra hard Chromic Catgut is three times as lasting as Plain Unchromicized Gut.

**SECOND:** Sizes of Catgut employed. Size 3 lasts twice as long as size 0. Sizes 1 and 2 occupy intermediate relations.

**THIRD:** Tissue involved. Catgut in muscle tissue is twice as lasting as in the Peritoneum. Catgut in skin is one and one-half times as lasting as in the Peritoneum.

As a means of determining the sizes of Ligatures to be ordered, we give on next page a table showing approximately the time of absorption of Plain Catgut, medium hard Chromic Catgut and extra hard Chromic Catgut as used under various conditions.

**LIGATURES AND SUTURES**

**Average Duration of Plain Catgut**

Size 0 lasts 4 days in peritoneum

Size 0 lasts 7 days in skin

Size 0 lasts 9 days in muscle

Size 3 lasts 8 days in peritoneum

Size 3 lasts 12 days in skin

Size 3 lasts 16 days in muscle

**Average Duration of Medium Hard Chromic Catgut**

Size 0 lasts 8 days in peritoneum

Size 0 lasts 14 days in skin

Size 0 lasts 18 days in muscle

Size 3 lasts 16 days in peritoneum

Size 3 lasts 24 days in skin

Size 3 lasts 30 days in muscle

**Average Duration of Extra Hard Chromic Catgut**

Size 0 lasts 12 days in peritoneum

Size 0 lasts 21 days in skin

Size 0 lasts 27 days in muscle

Size 3 lasts 20 days in peritoneum

Size 3 lasts 30 days in skin

Size 3 lasts 40 days in muscle

## LIGATURES AND SUTURES

### SIZES AND TENSILE STRENGTH OF CATGUT LIGATURES

B & B Catgut Ligatures are listed under sizes which have been adopted as standard by manufacturers generally. Beginning with the smallest size No. 00, each size represents an increase of about three thousandths of an inch.

The following table indicates the tensile strength. Each strand of catgut is tested. Any not up to these standards is rejected.

Catgut Sizes

00    0    1    2    3    4    5    6    7

## LIGATURES AND SUTURES

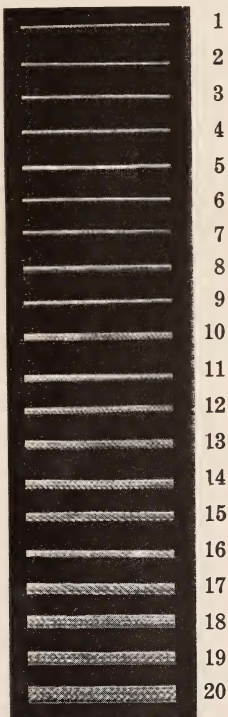

### SURGEONS' SILK

The numbers under which silk sutures are listed correspond to the standard trade sizes. No. 1 being the finest; No. 20 the coarsest. Twisted Silk sizes 5-9-12 correspond to Fine, Medium, Coarse. Braided Silk sizes 4-7-10 correspond to Fine, Medium, Coarse.

## LIGATURES AND SUTURES

### Surgical Catgut in Coils

Raw catgut should be kept dry and at a uniform temperature. Before sterilizing by heat it must be absolutely free from moisture.

### Ligatures in Tubes

Plain sterile catgut in tubes is free from moisture and put up in alcohol. If not sufficiently flexible drop in sterile or antiseptic water before using.

### Ligatures in Envelopes

All ligatures in envelopes are put in double germ proof wrappers before sterilizing. After sterilization they are placed in the outer printed envelope for further protection. Any degree of flexibility may be secured by dropping in sterile or antiseptic water before using.

### Sterile Silkworm Gut

Silkworm gut is a smooth suture material prepared by cleansing and drying under tension the silk-forming gland of the silkworm. Silkworm gut can be readily sterilized. The usual procedure is to immerse it in bichloride solution, after which it is boiled in water.

In grading the sizes of silkworm gut, they are classified as fine, medium and coarse, corresponding approximately to Nos. 0, 1 and 2 catgut.

### Sterile Horsehair

Horsehair is selected each strand being tested for strength. It is first thoroughly cleansed with soap and hot water and then sterilized by the vacuum and steam pressure sterilization process both before and after sealing in bottles or germ-proof wrappers. Horsehair sutures run from fourteen to twenty inches in length and stand a tensile strain of from one to two pounds.

## O-P-C SUSPENSORY

No. 2—Lisle, elastic bands . . . . .	dozen	8.00
No. 3—Silk, elastic bands . . . . .	dozen	12.00
No. 4—Silk, elastic bands . . . . .	dozen	16.00
No. 5—Fancy colored silk . . . . .	dozen	20.00

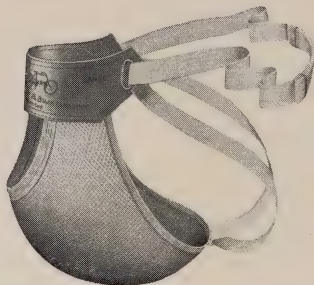

By liberal advertising we have made O-P-C suspensories known as the best at any price, and the strong demand thus stimulated is among the class of men who appreciate quality and who make desirable customers.

During the many years that O-P-C suspensories have been on the market they have sold at the same prices. No other widely advertised article yields so liberal a profit to the retailer.

The strong feature of O-P-C suspensories, aside from superiority of material and workmanship, is that they are anatomically correct: the sack is seamless and self-adjusting and the penis hole is so low that all constriction is avoided.

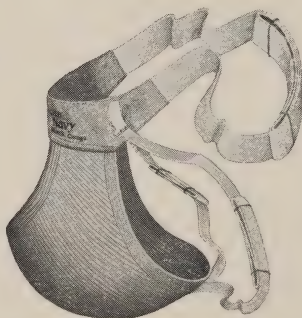

The fact that O-P-C suspensories are prescribed by a greater number of physicians than any other, is convincing evidence of their genuine superiority.

### PLEASE NOTE

The stretch in the knitted sides of our vests insures a snug fitting and comfortable garment.

We do not undertake to make vests that require anything special in the way of length, chest, bust or waist measure. In such cases, to insure satisfaction to the purchaser, measurements should be taken and the garment fitted by a tailor or dressmaker who can make alterations if necessary before the garment is finished.

When such special garments are desired, the druggist can supply the chamois, and the flannel may be procured at any dry goods store.

We do not make chest protectors or vests from special materials.

On these pages are listed all the styles we make—all other styles have been discontinued.
